
Call for Papers

Implementors, educators, and users of Forth are invited to submit their work for future issues of the *Journal of Forth Application and Research*. The editors of the *Journal* look for:

Applications Papers: describing in detail the use of Forth for a particular project.

Techniques Papers: addressing new methods for utilizing the power of Forth.

Review Papers: covering an entire subject area of Forth.

Technical Notes: a brief treatment of a single technique, idea, or problem, supported by an example or code implementation.

Algorithms: highlighting useful Forth routines and utilities of general interest.

These papers will be reviewed by members of the community with demonstrated expertise in the subject area. The *Journal* also publishes letters, book reviews, calls for papers, and notices of conferences and other events.

We encourage you to write up your work and send it to the *Journal*. Your experience with Forth is useful to other uses of the language, and your contributions are valuable additions to the available literature on applying Forth.

Send papers to the *Journal of Forth Application & Research*, Attn: Jonathan Ross, PO Box 27686, Rochester, NY 14627. Questions should be directed to Mr. Ross at 716-235-0168.
